

## **Motions**

**The following Motion was submitted by Councillor Tim Carroll:-**

That this Council acknowledges;

- a) That Global warming and finite resources are issues that affect us all.
- b) That a reduction in our Carbon footprint must be an achievable aim
- c) That a minimisation of energy bills for our residents is a high priority
- d) To facilitate the opportunity of easier switching between power providers through the provision of strictly impartial advice is an important element to the residents of SSDC.
- e) That to continue to follow an ethical policy as far as Carbon reduction as already illustrated by the Council's expanding use of PV arrays on Council buildings

**To further these aims, Council resolves that;**

In principle, it supports the initiative to further explore the potential benefits of a local Community Energy Company within the area of South Somerset.
